**Re: SEQRA# 20-004 Gasland Route 9  
2357-2367 Route 9D, Town of Wappinger  
Dutchess County**

Dear Mr. Grealy:

The New York State Department of Transportation (NYSDOT) has received and reviewed the proposed improvements at the intersection of Route 9D and New Hamburg Road for the proposed Gas Station. Based on our review we have the following comments.

NYSDOT is still concern with the proposed location of the building to Route 9D. With this proposed location the NYSDOT believes the building is at a greater risk of being struck by a vehicle and could cause serious damage. NYSDOT recommends that the building should be placed on the northwest corner of the property or a least far enough away to be out of the clear zone of the roadway.

Please remove all fix objects including the retaining wall and bus seating area/shelter out of the NYSDOT right of way (ROW). A permit will not be issued until these objects are removed from the ROW.

The NYSDOT is concerned with northbound left turning vehicles from Route 9D to New Hamburg Road. Please provided the NYSDOT a turning diagram showing this movement. Based on our experience NYSDOT believes the left turn lane stop bar for New Hamburg road will have to be pushed back (based on the design) for left turning traffic on Route 9D to make the turn manageable.

Also please provide the NYSDOT right turning diagram for vehicles making the turning movement from New Hamburg Road to southbound Route 9D. Please included a WB-50 truck turning diagram as this is the common size vehicle for delivers for gas stations/convenience stores

Very truly yours,

Jason Brenner  
Assistant Engineer
